-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

DETAILED ACTION

Specification

The use of the trademark Velcro has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 7 to 10 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 6 to 9 of prior U.S. Patent No. 6,634,041. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3673

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 to 6 and 11 to 16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 5 and 10 to 14 of U.S. Patent No. 6,634,041. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are nearly identical duplicates of the '041 claims, with the exception of that in the new independent claims 1 and 11 (corresponding to old independent claims 1 and 10) the clause setting forth the carrying strap has been removed and set forth in new dependent claims 4 and 12, respectively. This is within the ordinary level of skill in the art, since it is analogous to removing a component along with its function.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 22, the phrase "selectively" in the last line of the claim renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 to 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robitaille (US 5,244,278) in view of Hunt (US 5,072,467). Robitaille shows a travel pouch and blanket assembly that comprises a pouch 14 that can be opened and closed by a zipper 16 which extends across the width of the pouch. When the pouch is opened a blanket extension 18 can be unfolded from the interior of the pouch and extended outwardly. The pouch and blanket are formed by superposed layers of nylon 22 and terrycloth 20 that form an inner and outer layer respectively. Note that the nylon layer 22 forms a lining for the pouch when the blanket is rolled and placed within the pouch. Hunt teaches that a beach towel can include supplemental storage pockets 22, 24 at the foot end of the towel. The supplemental pockets 22, 24 are formed as multiply pockets with a closure fastening, and are used to store loose article or alternately can be used to hold sand as a weight for retaining the towel. It would have been obvious to the skilled artisan to have provided the Robitaille towel with supplemental storage pockets as taught by Hunt, for the purpose of allowing for the storage of loose article and/or as a means for weighing the towel down.

Conclusion

Art Unit: 3673

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Halls shows a folding ground mat that includes a storage pocket with a supplemental pocket 36 upon its outer face. Dominiqu and Pope show beach towels that also include supplemental pockets that are of interest. MacColl, Sullivan, Seals, French et al, and Moore show folding beach towels and ground mats that are of general interest.
